

Hydrawise-Ready Products

Controllers

Hunter's touchscreen residential controllers are your best choice for efficient and reliable predictive watering.

HC Flow Meter

Flow meters allow you to detect broken pipes, spray heads, and faulty wiring or valves.

Available wireless!

Schedule an appointment with your local irrigation contractor to see how you can maximise your system's performance to save both water and money.

The Most Complete Wi-Fi Irrigation Control System

Save up to
50% on your
water bills

Manage from Anywhere

Gain convenient system access anytime from your smartphone, tablet, or the web for a range of remote management capabilities. Remote monitoring allows you to conveniently view, manage, and monitor your irrigation controller.

Save Water

Advanced, web-based climate monitoring uses local forecast data including temperature, precipitation, wind speed, and other factors to automatically adjust your irrigation system to area weather conditions, ensuring plants remain healthy — rain or shine.

Protect Your Landscape

Designed to manage different landscapes across various climate zones, Hydrowise® Software prevents over- and under-watering to ensure your plants get exactly what they need to remain healthy and flourishing.

Add Your Contractor

Built-in valve monitoring instantly alerts your professional landscape contractor in the event of a problem, so you can rest assured that your outdoor living space remains protected and your irrigation system is in good hands.

“Every summer, our water bills are over \$100 just to keep our small grass area and other plants green. Since installing the Hydrowise unit, our water bill has gone from \$137 to \$74!”
